A soil penetrant has been added to maximize water percolation into the soil profile.

The basic material in **Gro-Power® Premium Green® 5-0-5**, as in all the Gro-Power® products, is Humus. Humus promotes bacterial propagation, tends to improve soil structure, helps to increase the moisture-holding capacity and helps in breaking up compacted soils. This product contains the highest amount of humus (50%) compared to other Premium Green® products. **Gro-Power® Premium Green® 5-0-5** also includes Humic Acids (12%). Humic Acids will react with the soil to condition it and produce an environment in which the plant can achieve maximum results.
